

## Bottle Insulator :

- Place sizing disc in bottom base for short bottles (Heineken, Blue Moon, etc..). Sizing disc isn't required for standard and tall bottles.
- Insert bottle into bottom base.
- Place center ring over the top of bottle and attach to base.
- Attach top cone to center ring and thread tightly.
- Use silicone stopper if you need to seal an open bottle.
- Enjoy!

Stopper to seal open bottles

Sizing Disc

Top Cone

Center Ring

## Opener :

- The cap and sizing disc both have a bottle opener.

## Care and Use :

- Wash with warm soapy water and hand dry.

## Can Insulator :

- Place sizing disc in bottom base for short cans (Coke, Pepsi, Budweiser). Sizing disc isn't required for taller cans (Coors Light)
- Insert can into bottom base.
- Place center ring over the top of can and thread tightly.

## Water Bottle :

- Connect the bottom base with top cone using the center ring.
- Make sure threads are tight on the top and bottom of the ring.
- The cap and center ring have soft gaskets to prevent leaks.
