*Let's Get Started*

THE Cassia MULTI-FUNCTION IPL  
QUICK START GUIDE

### The following people are not suitable candidates for Cassia IPL Treatments:

Pregnant and nursing mothers. People with eczema, psoriasis, lesions, open wounds or active infections (e.g., cold sores) in the intended treatment area should wait for the area to completely heal before using the handset. People with a history of keloidal scar formation. People taking medication that make the skin more sensitive to light, including non-steroidal anti-inflammatory agents (NSAIDs, e.g., aspirin, ibuprofen, acetaminophen), tetracyclines, phenothiazines, thiazide, diuretics, sulfonyleureas, sulfonamides, DTIC, fluorouracil, vinblastine, griseofulvin, Alpha-Hydroxy Acids (AHAs), Beta-Hydroxy Acids (BHAs), Retin-A, Accutane (isotretinoin) and/or topical retinoids. People with abnormal skin conditions caused by diabetes or other systemic or metabolic diseases. People who are currently using or have recently used Alpha-Hydroxi Acids (AHAs), Beta-Hydroxi Acids (BHAs), Retin-A, topical retinoids or azelaic acid. People who have used Accutane (isotretinoin) in the past 6 months. People who have used steroids in the last three months. People with a history of herpes outbreaks (unless a physician has administered a preventative treatment). People with epilepsy. People with active implants, e.g., a pacemaker, incontinence device, insulin pump, etc. People with a photosensitivity-related disease, e.g., porphyria, polymorphic light eruption, solar urticaria, lupus, etc. People with a history of skin cancer or areas of potential skin malignancies. People who have received radiation therapy or chemotherapy within the last 3 months.

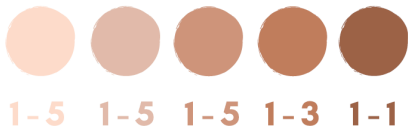

# Safety First

## PRODUCT RESTRICTIONS:

- Do not use the Cassia IPL Handset in or around the water.
- Do not use the Cassia IPL Handset near the eyes (use from the upper lip down).
- Do not use the Cassia IPL Handset if you are under the age of 16.
- Do not use the Cassia IPL Handset if you are menstruating, pregnant or lactating.
- You should not IPL over very dark freckles or moles, however light freckles are fine.
- Do not use the Cassia IPL Handset over tattoos.
- Do not use the Cassia IPL Handset on broken or burnt skin.
- Do not use the Cassia IPL Handset over the same area more than 3 times in a single session.
- Never aim the Cassia IPL Handset light window at or near your eyes.
- If you have been getting treatments at a laser clinic, you should wait 2 days before using the Cassia IPL Handset as this may increase your risk of a reaction.
- Remove any artificial tan before using the Cassia IPL Handset. If you have been naturally tanning, you should wait 2 weeks before using the Cassia IPL Handset.
- Wait 48 hours after using the Cassia IPL Handset before tanning (including any artificial tanning).
- Consult your physician if you have any adverse reactions.
- It is normal if your skin gets redness after IPL treatment. You can cool the skin with ice water or cold wet towel;
- Do not clean the flash window directly with alcohol spray;
- Do not use with any Gel cosmetic products;
- Try not to eat the photographic food, such as spinach, bok-choy, Chinese broccoli, etc;

# Setting Selection

## SKIN TONE SAFETY CHART

Due to the safety restrictions of IPL, we recommend users follow the chart above. All users should patch test a day in advance and start on the intensity level one gradually working your way up to the highest level suitable for you. Level 1 is lowest, level 5 is highest.

# Product Overview

## WHAT IS INCLUDED?

- 1 x Cassia Multi-function IPL handset
- 1x USB power Adapter Cord
- 1x User Guide
- 1x Acne Attachment
- 1x Age Spots Attachment

## PRODUCT FEATURES

- Assists with quickly destroying Acne bacteria to minimise Acne break-outs.
- Has been shown to break down pigment and lighten dark spots.
- Helps to smooth wrinkles and improve skin elasticity.
- Seeks to enhance the regeneration ability and permeability of skin cells.
- Simple, portable operation.

# Product Specs

Energy Level	3.9J- 7.8J/ cm <sup>2</sup>
Wavelength	470nm ~1100nm
Lamp Tube Life	500,000 flashes
Adaptor	100~240V AC Input
Operating Temperature Range	5~30 °C

# How to Guide

## DEVICE INSTRUCTIONS

- Insert the supplied cord into the top of the Cassia IPL handset and press green button on the back to turn on

- The green power button is also used to switch the intensity level by pressing it. Start on level one for your first treatment and choose the correct level suitable for your skin tone thereafter. The blue lights on the front indicate the intensity level (1 for low - 5 for high).

- The pink light on the intensity bar will begin to blink once you place the light window onto your skin. This indicates that the handset is ready to be used.

- Ensure that the light window is flat against your skin and click the pulse button to treat. The Cassia light window will flash pink when it is pressed directly against your skin. If the light window is not in direct contact with your skin the light will not illuminate and flash.

- Press the pulse button to treat. Activate glide mode by holding the pulse button for 5 seconds and releasing. This will send out continuous flashes to treat larger areas with ease. Repeat once a week until you see your desired results. Repeat once every 2-3 months to maintain hairless, smooth skin or as needed. Missing a treatment in your first 12 weekly sessions may delay results.

# Device Attachments

## Anti Acne IPL Lens

The principle of laser acne treatment: through high-intensity laser irradiation of a specific wavelength (400-700nm), it can quickly destroy Acne propionate bacteria, effectively inhibit bacterial reproduction, eliminate its stimulating and damaging effects on tissues, and at the same time make the expanded capillaries atrophy, congestion and redness. The inflammation quickly subsided, blocking the further damage of acne to the tissues, and at the same time promoting the early recovery of acne wounds, avoiding irreversible pits and acne scars in the future.

# Device

# Attachments

## Age Spot and Skin Rejuvenation IPL Lens

Laser skin rejuvenation is to use the photothermal separation effect of laser to penetrate a sufficient depth (5mm) into the skin, reaching directly to the dermis of the skin, then working on the collagen cells in the dermis to synthesize fibroblasts with melanin, hemoglobin and water targeted. The dermis is heated selectively to stimulate the synthesis of new collagen, thereby improving skin texture, skin color, fine wrinkles and other problems, and achieving the effect of skin rejuvenation.

# Device Attachments

## Hair Removal IPL Lens

The Cassia IPL Hair Removal Handset can be used on any body part (including your Face and Brazilian) in just a few minutes, all from the comfort of your own home! Most users notice a reduction of hair after 3-4 treatments, with desired results after 12 treatments. It is not necessary to treat the area more than once a week.

# More Info

## DEVICE INSTRUCTIONS

**WHERE:** You can use your handset anywhere below your upper lip. You can treat an area a maximum of 3 times in one session.

**TURN OFF:** Press and hold down the green button.

**CLEAN:** Unplug from the wall, dampen a cloth with a few drops of water and wipe over the light window.

## Results

Most users notice a reduction of hair after 3-4 treatments, with desired results after 12 treatments. It is not necessary to treat the area more than once a week. You may continue to do weekly treatments after 12 weeks if you have not reached your desired results.

# The Process

## TEST, SCRUB, SHAVE, TREAT, COOL, REPEAT

Patch **TEST** a small area before starting your first treatment. Ensure this area is shaved and clean.

### ***Let's start your treatment!***

**SCRUB** with a high-quality exfoliant before your treatments. This will help clear ingrown hairs and remove dead skin cells which will help the absorption of light meaning, better & faster results.

Always **SHAVE** the area you intend to treat. Ensure you do a close shave and no hair is showing above your skin before using your handset to avoid discomfort. If you have sensitive skin, shave the night before or the morning of your treatment. This will help avoid skin irritation. Do not wax or epilate during your treatments.

### ***Pick your IPL treatment Lens!***

It's time to start your Cassia IPL **TREAT**ment. Plug it in, switch it on and start on intensity level one. Press the light window lightly on your skin and click the pulse button on the front of the handset to activate the flash. Press and hold the pulse button for 5 seconds to start glide mode - continuous flashes are suitable for larger areas.

# The Process

## TEST, SCRUB, SHAVE, TREAT, COOL, REPEAT

Hydrate and **COOL** your treated skin with a high-quality moisturizer or cooling gel to keep your skin healthy and glowing.

**REPEAT** once a week with 3 passes per area each session until you see your desired results. Continue to use once every 2-3 months or as needed to maintain results.

***Enjoy your Smooth Skin!***

DISCLAIMER: IPL may have side effects, including but not limited to pain, skin irritation and dryness, swelling and bruising of the treatment site, blistering and scarring of the skin, the appearance of scabs, red skin or red spots, lightened or darkened areas of skin (hypo and hyper-pigmentation), and reactivation of Herpes simplex. Some side effects may be long-lasting or even permanent. Multiple Cassia IPL treatments may be necessary to achieve optimum results. The number of sessions will vary for each person. There is no way to predict in advance how many sessions will be needed. This is a process and therefore not an exact science and results may vary based on individual factors, including medical history, skin and hair type, your compliance with pre/post-treatment instructions, and your individual response to IPL. Although complications are rare, sometimes they may occur and that attention may be necessary. In the event of any complication, contact your physician immediately. Please read the precautions and safety guidelines provided in this booklet before using the Cassia IPL Handset.

## **Warranty Claim**

**If your product is defective and you require a replacement, simply follow these instructions:**

- Take a clear video of the defect. If the video does not clearly show a defect you may not be eligible for a replacement.
- Email [info@trycassia.com](mailto:info@trycassia.com) with your order number, a sentence about the defect and your video attached.
- Once approved, follow the steps given by our customer care team.

The eligibility for a replacement is up to the discretion of the Cassia staff. DO NOT attempt to open or repair your system. Opening the device may expose you to dangerous electrical components which may cause serious bodily damage. Trying to open the Cassia IPL handset may also damage the system and will void your warranty.
